Assassin's Creed Odyssey's Common Debate 'Gt; The Nightmare Theme - Best Ship Updates Priorities? So I recently started playing the game and started in Nightmare mode and finished the first two areas (Kephallonia and Megaris). I'm on level 13 right now. Ground combat isn't too bad so far, I'm used to challenging action games/ARPGs, but sea battles can be quite tricky. The 1v1 or 2v1 ship fight is not too big a problem so far, but 3v1 is very risky and relies on tearing weak ships down and mid-fight landing, and even then it's hit or miss. And some enemy fleets are up to 5 ships. I use ship combat as a way of shredding materials to modernize ships. Are there specific updates I should really focus on above others? So far I have increased the body (which also gives more lieutenants), archers/arrows, and an unlocked fire arrow. I think that continuing to pump the hull as much as possible would be better as maxing out lieutenants can make up for not enhancing other skills. Also, is there any reason to focus on the arrows against the spear? I admit I really don't know the difference, other than what button I press to use them. Finally, and something aside - is there ever any reason to board the last ship you win, or is it always best to ram it in half for bonus loot? (Please no spoilers about content that I haven't come across yet). The latter, edited by Goilveig; April 29, 2019 - 8:17PM Hull is only important as long as it gives you extra lieutenant slots. The highest priority is the ability to shoot four-shot volleys in quick succession. Spear volleys are less useful, but you'll need them, too. Also upgrade the arrows and spears themselves as well as your fiery attacks. To split the big ships in half after defeating them you will have to regularly upgrade the ram, which is important as it can replenish your fiery attacks. Basically whenever you do missions on the ground, scout enemies with Ikaros and look for those with a golden background. These are legendary lieutenants who come with special skill in the same way as the legendary weapon comes with a special engraving. Look for a skill that looks like Rostra, the ram used by Greek ships. There are two good abilities hidden in this category. The first is replenishing your lights after splitting the ship in half, and the other increases the increase in life after splitting the ship in half. When dealing with multiple ships always kite away so that they follow you around. If you have allies supporting you use them as a distraction or a meat shield. Let one of them enter the maximum range of the arrow and then fire all four volleys, giving a full broadside. When the enemy ship returns the fire, immediately turns away. Since it's still so far shells will enough time in the air for you to dodge them all. Don't forget the braces though. Use fiery attacks to speed up the process and ride in wide circles so that you can regularly ram the ships you are off. ves (dot) lv 70 legendary lieutenants with fire restoration will fully replenish all attacks after the sinking of one ship, ramming. Don't forget to use speedboost to do this. Note: This is only to be used to report spam, advertising and problematic (harassment, wrestling, or rude) messages. Assassin's Creed Odyssey shows the return of Assassin's Creed IV: Black Flag-style sea battles. Where there is a ship in Assassin's Creed, there is a way to upgrade it, and the ship in the Odyssey serves as the only form of crafting in the game. Get your ship in, well, ship shape with this upgrade guide Ubisoft Assassin's Creed Odyssey Ship CraftingLike CraftingLike CraftingLike Crafting In most other games, ship upgrades in Assassin's Creed Odyssey require the player to collect resources. There are six different resources needed to upgrade ships, but not every resource is used for each upgrade. Updates also require a moderate amount of money, usually between 1000 coins for early upgrades and in quintessential figures for the best ship upgrades. Six resources include: WoodIronAnimal SkinsPresent Stonesint tablet Obsidian GlassMost of these resources can be found in the wild. Choose trees and stones to provide wood and iron, while some rocks also pay off with gemstones and obsidian glass. Obsidian glass is also an ordinary object looted from chests and from the bodies of enemy leaders. Animal skins can be found in killed animals, and it does not matter what type of animal it is. The real hold up I was with the ancient pills. They can be found hidden in the ruins of old buildings and structures, but must be looted. You are not just going to stumble upon an ancient tablet sitting like you would a tree or a stone. Be sure to also check in every blacksmith you find. At the bottom of their inventory, blacksmiths carry craft components. Most blacksmiths have wood and iron, while other resources appear less frequently. Assassin's Creed Odyssey Ship Upgrades there are only nine areas of the ship that can be upgraded in Assassin's Creed Odyssey. They are: The hullUpgrading hull gives your boat more points of impact and open more slots for lieutenants, who will be hired by Therer staminaUpgrading it increases your enhancement duration, and accelerates your recovery timeSrew armorThis provides additional benefits for attaching against incoming enemy attacksAer damage weaponsIt makes the arrows attack more severeR damage weaponsIt increases how effective spears are against boatsRam damageIncreases the force of your ship while ramming into another shipArrow volleys Increase the number of arrows you can do While reducing the recharge time between attacksSpear volleys will increase the number of spear attacks you can do, while reducing recharge time between attacksFire braziersFirst update introduces fiery attacks for arrows copies, subsequent updates allow more attacks and faster build up attacks. Ship cosmetics, such as a figure, outfits for crew members and special sails, can also be Anytime. They can be found in the bottom right corner of the Ship page in the pause menu. They do not provide any gameplay benefits and are purely for appearance. So what do you think? Are you ready to get into the open ocean and upgrade your ship to the max in Assassin's Creed Odyssey? Are you lucky enough to find these pesky ancient pills? Let us know your thoughts in the comments section below. After starting your adventure in Assassin's Creed Odyssey, you will get access to the ship, Adrestia, and its captain, Barnabas. As in Assassin's Creed Black Flag, you'll be able to move from exploring on land and at sea, traveling to any port and calling Adrestia - allowing you to participate in both naval combat and bypass. Adrestia boasts a wide range of upgrades, both practical and cosmetic - and it's either worth the money or you'll have to know which underwater ruins to loot. See Ship UpgradesSee Ship CosmeticsUpgrades are an integral part of every aspect of your ship - from rowing and ram to javeling and arrow firepower, and you'll want to upgrade all of them to remain a formidable force on the seas. You can also upgrade the hull of your ship to include more recruited lieutenants to further enhance your craft abilities. Unlocked DefaultUpgrade 1: Allows 2 Arrow Volleys, -5% Reboot TimeUpgrade 1 Cost: 105 Wood, 60 Leather, 1090 DrachmaeUpgrade 2: Allows 3 Arrow Volleys, -10% Reboot TimeUpgrade 2 Cost: 220 Wood, Wood, Wood 130 Leather, 2 Ancient Tablets, 2320 DrachmaeUnlocked DefaultUpgrade 1: Allows 2 Javelin Throws, -5% Reboot TimeUpgrade 1 Cost: 60 Metal, 105 Wood, 1090 DrachmaeUpgrade 2: Allows 3 Javeling Throws , -10% Reboot TimeUpgrade 2 Cost: 130 Metal, 220 Wood, 2 Ancient Tablets, 2320 DrachmaeUnlock: Allows you to charge arrows or spears with fire damage and burn boats over time for a limited time.
